FRONTEND DEVELOPER

Practical Technical Assessment

DYNAMIC ONLINE COURSE WEBSITE

Time Limit	24 Hours
Frontend	HTML5, CSS3, Bootstrap 5
Backend	Core PHP
Database	MySQL

1. Objective

Build a simple, responsive and database-driven online course website. Courses must be stored in MySQL and displayed dynamically.

2. Required Pages

• Home Page – hero, featured courses and categories

• Courses Page – display all courses dynamically

• Course Details Page – display course information dynamically

• About Page

• Contact Page

3. Dynamic Course Data

• Course Name

• Course Slug

• Category

• Price

• Course Image

• Short Description

• Full Description

• Course Duration

• Status

4. Dynamic Course Pages

Use one reusable PHP course-details template. Each course must have a unique SEO-friendly URL/slug and load its information from MySQL.

5. Basic Dynamic SEO

• Dynamic page title

• Dynamic meta description

• SEO-friendly unique slug

• Dynamic H1 heading

• Image alt text

6. Technical Requirements

• HTML5, CSS3 and Bootstrap 5

• Core PHP and MySQL

• JavaScript for basic interactions

• Responsive desktop, tablet and mobile design

• Prepared statements for database queries

• Reusable PHP components

7. Database

Create a MySQL database with a **courses** table. A separate **categories** table may be used for dynamic categories.

8. UI/UX Requirements

• Clean and professional design

• Bootstrap 5 responsive layout

• Course cards with image, name, price and short description

• Clear navigation and readable content

• Mobile-friendly course details page

9. Submission

• Complete source code

• database.sql

• README with setup steps

• Sample course data

• Screenshots

10. Evaluation – 100 Marks

Area	Marks
PHP & MySQL Backend	20
Dynamic Course Listing	20
Dynamic Course Details	20
Responsive UI / Bootstrap	15
Dynamic SEO	10
Database Design	10
Code Quality & Documentation	5
Total	**100**

Excluded: Admin Panel, Cart, Checkout and Payment Gateway.

Final Task: Build the simple dynamic online course website within 24 hours using HTML, CSS, Bootstrap 5, Core PHP and MySQL.
